

1. Making a Call

To make a call dial the required number and press "Talk". To end the call, press "Cancel".

2. Speed Dial

To set up the speed dialing, press and hold (0-9) button. Press "Menu" and select "Edit", enter the contact name and then the phone number. Then it is possible to select "Auto Call", the phone number is dialed on prolonged holding, or "Manual", the phone number is dialed while pressing the "Talk" button.

3. Telephone Directory

Enterprise directory contains all active users of the company, external numbers cannot be saved here (e.g. employee mobile numbers or external partner telephone numbers).

Personal directory is intended for user private contacts and is available on all devices. Administration (adding, editing or deleting items) can be done via the portal.

4. Searching in Telephone Directory

An item in the telephone directory can be searched by entering a name: Press the status button "Tel. Directory", and then select the type of the directory and confirm by "OK". Enter the name or the first letters of that name and confirm "OK". In T9 mode just press the key once, the phone searches for all the items corresponding the letters below the key. This method is significantly faster. Select the required item and press "OK". Select the required telephone number and press the "Talk" button to make a call. Switching between the insert modes can be done by clicking the right status button.

5. Call Register

Press the "Outgoing log" soft key. Then a list of outgoing calls will appear. To display a list of incoming calls, press the "Incoming log" soft key. Scrolling through the list is done using the navigation buttons. Select an item from the list to delete it. Press the "Menu" soft key. Select "Delete" and confirm "OK". Then select "Yes" and again confirm "OK". To delete all items, select "Delete all" instead. To make a call press "Talk".

6. Redial

The last phone number dialed is stored in the redial list (each 32 digits max.) If the Redial key is assigned to dial key, you can dial the last dialed number by pressing the "FUNC" button and then "Redial".

7. Call Hold and Park

To hold the call, first, press the "HOLD" button, the caller hears music. To return to the call on hold press the "HOLD" button again.

Parking: To set up during a call press the "Func" button and then "Park". Afterwards enter the number you want to park the call on and press "#" to park the call on your number. To restore the parked call press the "Park" soft key and enter the number, where the call is parked or press "#" again to restore the parked call on your number.

8. Call Transfer

Call transfer without consultation: Press the "BLIND" button during the call. Dial the number of a participant you want to transfer the call and press "Dial". Call transfer with consultation: Press the "TRANSFER" button during the call. Dial the number of a participant, you want to transfer the call and press "#" or "Dial". You can talk the other participant, transferring can be done by pressing the "TRANSFER" button and hanging up.

9. Three - Participant Conference Call

During the call you can add to the ongoing conversation another participant so you can make a conference call. To make the conference call press the "FUNC" during the call and then select "Conference". Dial the number of a participant you want to add and press "Dial". After the call is received, press the "Conference" soft key.

10. Making a call to another handset within the base station

Press the "Menu" soft key and then "Intercom". Select the handset, you want to speak with and confirm "OK". These internal calls have different ringtones. The selection is only available in case there are at least two handsets registered on the base station.

11. Loudspeaker Mode Call, Adjusting Volume

Turning on/off the Loudspeaker mode call: By clicking the "Talk" button.

Adjusting Volume: During a call you can adjust the volume by pressing the "Up" and "Down" button (level 1-6). Similarly, adjust the volume during an ongoing loudspeaker mode call.

12. Language Settings

Serves to change the language of the display option. The language setting of the telephone is dependent on the user profile settings in the portal. You can download up to 10 languages. To change the language right on the telephone, select "Setting Handset" in "Menu". Then select "Display Option". Pressing the "Language" button will display list of languages that you can set up by pressing "OK". The handset reboots itself afterwards.

13. Power On/Off

To turn the power of the handset on or off, press and hold "Power" button. In "Menu" -> "Setting Handset" -> "Incoming Option" -> "Power Save" you can also set up Power Save Mode, which automatically turns off the ringer, LCD backlight and key backlight after a set number of seconds have passed while receiving a call.

14. Noise Reduction

When Noise Reduction is enabled, environmental noise is reduced. Receiver volume is increased according to the level of environmental noise. It cannot be used in Hands-free mode. Noise Reduction can be enabled by default for regular use, or toggled on/off during a call. To activate the mode press in menu "Setting Handset": Select "Talk Option" -> "Noise Reduction". Press "On" to activate, to deactivate press "Off". Confirm "OK".

15. Voice Message Listening

If you receive a voice message, the "Voice message" text and icon is displayed and a number of voice messages in voice mail. Press and hold the "HOLD" button. Select the line, for which the "Voice Message" icon is displayed and confirm "OK". If there is only one line configured for the handset, skip the second step. This function cannot be used, if there is call on hold.
